

THE PERFECT SIGNING FOR MARKET DRAYTON FC

3r Projects completed EICR remedial work at Market Drayton Town FC

Outdoor electrical remedial work.

Electrical works completed in club house.

Project overview

3r Projects were the perfect signing to complete EICR remedial works at Greenfields Sports Ground home to Market Drayton Town FC. The grounds are also home to “The Gingerbread Men”, and the centre is used on a daily basis by other organisations - Market Drayton Tigers (junior football), Tennis Club, Rugby Club, and the Men’s Shed workshop.

Following an EICR report, Market Drayton Town Council put the remedial works out to tender.

The 3r Projects team won the contract to complete works such as replace distribution boards, correct wiring issues, replace tubular heaters, replace damaged sockets and light fittings and make repairs to stanchion control boxes.

All the work was carried out during business hours over a 4-week period, minimising interruption to game, set and matches, including scrum downs!

Project outcome

All electrical work completed on time and in budget, giving Market Drayton Town FC reassurance for the coming months.
